Nope...I believe I was talking about another email. In any case, no big deal. The Q3 DRAs we plan to discuss are below

Q3 moved from Q2 – EPTC, Pyrethrins (HED only), Pendimethalin, Cyfluthrins (HED only), Phostebupirim (DRA done but addressing RD issues), Imidacloprid (HED only)

Q3 – Chlorpropham, Methiocarb, Methomyl (ESA April), Metribuzin, Oxamyl, p-Diclorobenzene, Indoxacarb, Prometryn, Oryzalin, Asulam, Permethrin (HED only), gamma- and lambda-Cyhalothrin (HED only), Etofenprox (HED only), Trifloxystrobin

If you could resend, that would be great. Thanks and sorry - I must have inadvertently deleted checking email on my phone.

Anita,

We will be discussing the planned Q3 RAs that were sent in the email last week. Your BCs and chemical teams should have already been contacted by PRD. If they weren't please let me know. We want to give a general overview of the risk picture for each chemical. I can resend the list in the am if you need me to do so. Thanks for checking in!

Hi Billy,

Can you provide a list of chemicals (DRAs/PIDs) that will be discussed at the upcoming Program Review meeting? We are planning on using our EFED management meeting this coming Wednesday to get an initial update from the BCs on chemicals to be discussed. If you could provide the list by COB tomorrow, I'd appreciate it.

Thanks,

Anita
